number or length of slides. Note: For best results, it is important that the images are in JPG format. After adding an image you can change its settings in the back-end interface.

4. Choose a template you want to use for the new gallery that you created. Note: Simply drag and drop the template you downloaded for the app on the desktop with your phone screen facing up, so that the image you added appears in the middle of the desktop. Then start taking photos right away. Creating a photo album will take approximately 5 seconds and will be done in back-end.

5. Save your new created photo album to the Documents folder.

6. Make sure to check that the app is running in the background (while you click the '+' symbol), and reload the app. There is a small animation on the desktop when you click the app icon.

7. Use the new gallery to display your pictures and videos. One of the most annoying things about the

iPhone is the inability to copy text from the web pages. This problem was most definitely solved when iPhone app save all the text you copy automatically into the clipboard!

Recently, the save text function was improved. A good example of this is when you try to copy a blogpost. Before
