Less than one month ago we posted a video featuring our couple of guitars from Rampage Army & Imke a.k.a. Tiger Tank 59. Now we got another musical partnership, featuring another GTA guitar model from the heritage firm of Rampage. This time we got one of the world famous Break The Fog's 1953 model MP057. To get the good stuff, you should know that Break The Fog was the prototype of the fuzz tone which helped to make the Fender Stratocaster a successful guitar both in high and lower graded markets. This guitar model's 59 produced a primitive version of this classic tone. Aside from Army's and Imke's versions which we posted last time, we've seen other models that seemed to be limited to die-hard collectors, but this Break The Fog 59 is the rarest one. It is like a show-stopper from Rampage. Because of its limited number, the price for this petite guitar will be equal to the money at which Rampage sells guitars. But even so, this kind of guitar is not only pricey, but also extremely rare and even hard to find. Like the GP011, MP057 shares the same body shape, but has a slightly lower price. It comes in a set of pickups and two sets of controls - one set is on the front panel and the other on the rear side panel. Some main specs also include a Floyd Rose bridge with large hex nuts, a five-way pickup selector switch with the tone controls located above the body, three output jacks, one master volume control, one master tone control, and one master tone control and mute switch. Who is Tiger Tank 59? Tiger Tank 59 came into being in 1998. The year which is considered to have marked the birth of Arnold Schmidt because of its pioneering effects pedal company that he designs and develops. This pedal producer was created to give to the guitar instrumentalists and vocalists something extra, making their rock performances sound even better. Considering this, the Break The Fog model's name reminds of Lionel Richie's smash hit that is a must-know in every collection. But while Lionel Richie was only one of the Tiger Tank 59's client-base - there were also many others brands

that have tried to get a hold of their designs and make them available on the market. Unfortunately, the vast majority of these efforts are
